METAPHYSICAL MODELS

This book is a catalogue of work rendered in Carrara. I built the virtual objects in Hexagon2 the works are a fusion of the perambulating machines i built for street theatre and my surreal symbolistic language. The titles will open the doors for you, just let go and soar ●●●●●

One way or another I have always been pursued by the metaphysical. I was in Lisbon in '96 when Portugal made announcement to the world that the ●●Navigators of the Old World●● would now become the navigators of the world wide web and so ●● virtual worlds/the metaphysical.

Synchrony exploded in my seeking mind to pursue this ●● el dorado ●● of virtual space. Unceremoniously dumped in deep virtual space without tools or supplies I could only rely on intuitive imagination and over time was able to attach handles, tags and meaning to those objects I sculpted

●● then I started to take photos to share and these are they ●●
the rest is Nowstory and its ongoing.
